

CIDDY S. MACAPINLAC

AI Automation Specialist | Agentic RAG & LLM Integration | GoHighLevel | n8n | Python

Lapu-Lapu City, Cebu, Philippines | 0993-917-4342 | zed.maxcapinlac@gmail.com | linkedin.com/in/ciddy-macapinlac-580a1432a

SUMMARY

AI Automation Specialist with hands-on experience across the automation lifecycle: CRM workflow architecture, webhook and API integrations, Python-based data pipelines, and LLM-powered decision logic. Currently contributing to an agentic RAG integration effort at Metawatt (Surplus AI Orchestrator), building the GoHighLevel automation layer that agentic workflows run on top of. Proficient in GoHighLevel, n8n, Python, and prompt engineering, with software development foundations in React, Spring Boot, and Java.

TECHNICAL SKILLS

AI & Automation: LLM Integration (Claude, ChatGPT APIs), Prompt Engineering, Agentic/RAG Workflows, n8n, GoHighLevel, Webhook-Driven Automation

Development: Python, Java, JavaScript, React, Spring Boot, PHP, HTML/CSS, REST APIs, OOP

Integrations & Data: API Integration, Web Scraping (Playwright, Selenium, BeautifulSoup), Automated Data Pipelines

Cloud & Tools: AWS (Cloud Foundation & Architecting), MySQL, PostgreSQL, Git, Netlify

WORK EXPERIENCE

AI Automation Specialist | Metawatt, AI Innovation & Automation Platform

Jan 2026 – Present

Internship Jan–Apr 2026, absorbed into an ongoing contracted role from Apr 2026

- Contribute to agentic RAG integration on the Surplus AI Orchestrator project, building the GoHighLevel automation and CRM layer that agentic, multi-channel workflows run on top of.
- Own the GoHighLevel side of a Power of Attorney and attorney-handoff pipeline for a surplus-funds recovery process: built and debugged workflows spanning document delivery, signature capture, and attorney handoff; redesigned document collection from native e-signature to a file-upload form to correctly support wet-signed, photographed documents; and sourced and imported 72 attorneys across 16 US states as structured CRM contacts.
- Engineered Python web scrapers (Playwright, Selenium, BeautifulSoup) to extract property and county-record data, feeding results directly into CRM automation workflows.
- Built a CRM data pipeline converting raw contact data into validated, de-duplicated structured records.
- Designed and launched Faithful Alliance, a multi-page GHL marketing funnel with lead-capture forms, a deadline calculator, and CRM-connected booking logic; documented via structured SOPs.

GHL Automation Specialist / Assistant

Jul 2026 – Present

Prohealth Pest Control & SEC Inspection Services

- Build and maintain GoHighLevel workflow automations, including triggers, conditions, delays, and multi-step pipelines, to drive lead follow-up and reduce manual handling.
- Develop lead-recovery sequences with conditional branching and segmentation logic to re-engage unresponsive contacts, and test and troubleshoot automations end-to-end to keep live workflows reliable.
- Extend CRM capabilities through webhooks and third-party integrations, working alongside the primary automation specialist while taking on additional projects and documentation.

PROJECTS

AI-Personalized Lead Pipeline (n8n + GoHighLevel + LLM API)

- Built an end-to-end pipeline: GHL form submission to webhook to n8n, company-data enrichment via API, LLM-driven personalized outreach copy, tier classification, a real-time Discord alert, and a CRM record update.

GHL Lead Recovery Automation

ciddysed.github.io/lead-recovery-portfolio

- Designed an end-to-end CRM lead-recovery system with conditional branching, delay steps, and segmentation tagging to re-engage unresponsive contacts; documented as a public case study with a Loom walkthrough.

SleepSync, Full Stack Wellness App

sleepsyncapp.netlify.app

- Built a responsive React frontend, a REST API backend (Java/Spring Boot), and a structured MySQL schema end-to-end as a solo project.

EDUCATION

BS Information Technology | Cebu Institute of Technology, University

2021 – 2025

- Capstone Team Leader

CERTIFICATIONS

AWS Cloud Foundation | AWS Cloud Architecting | Java Programming | MySQL
